SUMMARY

B-Tech Computer Science student with hands-on experience in Python, Flask, PostgreSQL, Kotlin, and Android development. Built web and Android applications involving database integration, REST APIs, and responsive user interfaces. Eager to strengthen software development skills through practical projects and continuous learning while contributing to real-world applications.

PROJECTS

Placement Tracker

[GitHub](#) | [Live](#)

- Developed a full-stack web application to manage placement applications and interview progress.
- Designed a PostgreSQL database using SQLAlchemy for efficient application data management.
- Implemented CRUD functionality with a responsive Bootstrap interface.
- Added application status tracking, interview stages, and notes management.
- Deployed the application on Render using a cloud PostgreSQL database.
- Used Git and GitHub for version control.

Weather App

[GitHub](#)

- Developed an Android application to display real-time weather information using REST APIs.
- Implemented city-based weather search with dynamic UI updates.
- Parsed JSON responses using Retrofit and handled API error states.

Wallpaper App

[GitHub](#)

- Built an Android wallpaper application using API-based JSON data.
- Implemented category-based wallpaper browsing with dynamic content loading.
- Designed a responsive interface for smooth image browsing.
